Forensic Science International, 35 (1987) 297–301
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 35 (1987)

Abuse
torture, doctors, medical ethics, 237
Adipocere formation
Micrococcus luteus, substrate specificity, 10-hydroxy fatty acid, 10-oxo fatty acid, 277
Alcohol
stomach content, time after food intake, contrast media, emptying time, digestion in the stomach, time of death, 83
Ampholine
isoelectric focusing patterns, red cell phosphoglucomutase, Ampholine/separator, immobilised pH gradient, 213
Ampholine/separator
isoelectric focusing patterns, red cell phosphoglucomutase, Ampholine, immobilised pH gradient, 213

Barbiturates
drug abuse, lethal intoxication, parenteral way, 141
Benzodiazepines
mass spectrometry, negative ion chemical ionization, wide-bore capillary GC, 165
Bis(2-chlorethyl)-sulfide
detection in urine, gas chromatography-high resolution mass spectrometry, 67
Blasting cap
bombing, explosion, fragment, scanning electron microscopy, fiber structure, "dimple" pattern, "knife-edge" pattern, 219
Blood
fingerprints, gels, semen, saliva, marks, 267
Bloodstain
hemoglobin, enzyme immunoassay, Fab', peroxidase, 253
Bloodstain
electron spin resonance, estimation, time after bleeding, degradation, heme, methemoglobin, non-heme iron, radicals, 149
Bombing
blasting cap, explosion, fragment, scanning electron microscopy, fiber structure, "dimple" pattern, "knife-edge" pattern, 219
Brain oedema
post mortem diagnosis, 125
Breath-analyzer
breath alcohol, EBT-machine, performance, requirements, laboratory testing, 27
Breath alcohol
EBT-machine, breath-analyzer, performance, requirements, laboratory testing, 27

Cadaver kidneys
"opting out", "opting in", the priority principle, determination of death, 131
Cathepsin A, B and D
vital and postmortem wounds, differential diagnosis, 51
Contrast media
stomach content, time after food intake, alcohol, emptying time, digestion in the stomach, time of death, 83
Counter current electrophoresis
teeth, putrefied, species, 209

Deaths
morphine, interpretation HPLC, 189
Degradation
electron spin resonance, bloodstain, estimation, time after bleeding, heme, methemoglobin, non-heme iron, radicals, 149
Dehydrogenases
ischemic injury, diagnosis, 231
Detection in urine
bis(2-chlorethyl)-sulfide, gas chromatography-high resolution mass spectrometry, 67
Determination of death
"opting out", "opting in", cadaver kidneys, the priority principle, 131
Diagnosis
dehydrogenases, ischemic injury, 231

Differential diagnosis
vital and postmortem wounds, cathepsin A, B and D, 51
Diflunisal
fatality, drug concentrations, 45
Digestion in the stomach
stomach content, time after food intake, alcohol, contrast media, emptying time, time of death, 83
"Dimple" pattern
blasting cap, bombing, explosion, fragment, scanning electron microscopy, fiber structure, "knife-edge" pattern, 219
DNA fingerprinting
vaginal swabs (semen contaminated), hypervariable DNA, 145
Doctors
torture, abuse, medical ethics, 237
Document
printers, dot-matrix, printout, 283
Dot-matrix
document, printers, printout, 283
Drug abuse
barbiturates, lethal intoxication, parenteral way, 141
Drug addiction
liver pathology, viral hepatitis, 11
Drug concentrations
diflunisal, fatality, 45

EBT-machine
breath alcohol, breath-analyzer, performance, requirements, laboratory testing, 27
Electron spin resonance
bloodstain, estimation, time after bleeding, degradation, heme, methemoglobin, non-heme iron, radicals, 149
Electrophoresis
human saliva, polymorphism, population genetics, Japanese population, 119
Emptying time
stomach content, time after food intake, alcohol, contrast media, digestion in the stomach, time of death, 83
Enzyme immunoassay
hemoglobin, Fab', peroxidase, bloodstain, 253
Estimation
electron spin resonance, bloodstain, time after bleeding, degradation, heme methemoglobin, non-heme iron, radicals, 149
Explosion
blasting cap, bombing, fragment, scanning electron microscopy, fiber structure, "dimple" pattern, "knife-edge" pattern, 219
Extraction technology
psychotropic drugs, high-performance liquid chromatography, UV-detector, 73
Eye-fluid
toxicology, postmortem, 61

Fab'
hemoglobin, enzyme immunoassay, peroxidase, bloodstain, 253
Fatality
diflunisal, drug concentrations, 45
Fiber structure
blasting cap, bombing, explosion, fragment, scanning electron microscopy, "dimple" pattern, "knife-edge" pattern, 219
Fingerprints
gels, blood, semen, saliva, marks, 267
Forensic
group specific component, α-2-HS-glycoprotein, race, marker, frequency, population, 197
Fragment
blasting cap, bombing, explosion, scanning electron microscopy, fiber structure, "dimple" pattern, "knife-edge" pattern, 219
Frequency
group specific component, α-2-HS-glycoprotein, race, marker, population, forensic, 197

Gas chromatography-high resolution mass spectrometry
bis(2-chlorethyl)-sulfide, detection in urine, 67
Gels
fingerprints, blood, semen, saliva, marks, 267
Group specific component
α-2-HS-glycoprotein, race, marker, frequency, population, forensic, 197

Head injury
white matter damage, 1
Heme
electron spin resonance, bloodstain, estimation, time after bleeding, degradation, methemoglobin, non-heme iron, radicals, 149

Hemoglobin
enzyme immunoassay, Fab', peroxidase, bloodstain, 253
High-performance liquid chromatography
psychotropic drugs, extraction technology, UV-detector, 73
α-2-HS-glycoprotein
group specific component, race, marker, frequency, population, forensic, 197
Human saliva
polymorphism, population genetics, Japanese population, electrophoresis, 119
10-Hydroxy fatty acid
Micrococcus luteus, substrate specificity, 10-oxo fatty acid, adipocere formation, 277
Hypervariable DNA
DNA fingerprinting, vaginal swabs (semen contaminated), 145

Immobilised pH gradient
isoelectric focusing patterns, red cell phosphoglucomutase, Ampholine, Ampholine/separator, 213
Interpretation HPLC
morphine, deaths, 189
Ischemic injury
dehydrogenases, diagnosis, 231
Isoelectric focusing electrophoresis
personal identification, salivary α-amylase polymorphism, 159
Isoelectric focusing patterns
red cell phosphoglucomutase, Ampholine, Ampholine/separator, immobilised pH gradient, 213

Japanese population
human saliva, polymorphism, population genetics, electrophoresis, 119

"Knife-edge" pattern
blasting cap, bombing, explosion, fragment, scanning electron microscopy, fiber structure, "dimple" pattern, 219

Laboratory testing
breath alcohol, EBT-machine, breath-analyzer, performance, requirements, 27
Lethal intoxication
barbiturates, drug abuse, parenteral way, 141
Liver pathology
viral hepatitis, drug addiction, 11

Marker
group specific component, α-2-HS-glycoprotein, race, frequency, population, forensic, 197
Marks
fingerprints, gels, blood, semen, saliva, 267
Mass spectrometry
benzodiazepines, negative ion chemical ionization, wide-bore capillary GC, 165
Medical ethics
torture, abuse, doctors, 237
Mercury poisoning
toxic metals, stomach contents, X-ray fluorescence, sudden death, 181
Methemoglobin
electron spin resonance, bloodstain, estimation, time after bleeding, degradation, heme, non-heme iron, radicals, 149
Micrococcus luteus
substrate specificity, 10-hydroxy fatty acid, 10-oxo fatty acid, adipocere formation, 277
Morphine
deaths, interpretation HPLC, 189
Mother-fetus,
overdose, organophosphate, toxicologic analysis, 249

Negative ion chemical ionization
benzodiazepines, mass spectrometry, wide-bore capillary GC, 165
Non-heme iron
electron spin resonance, bloodstain, estimation, time after bleeding, degradation, heme, methemoglobin, radicals, 149

"Opting in"
"opting out", cadaver kidneys, the priority principle, determination of death, 131
"Opting out"
"opting in", cadaver kidneys, the priority principle, determination of death, 131
Organophosphate
mother-fetus, overdose, toxicologic analysis, 249
10-Oxo fatty acid
Micrococcus luteus, substrate specificity, 10-hydroxy fatty acid, adipocere formation, 277
Overdose
mother-fetus, organophosphate, toxicologic analysis, 249

Parenteral way
barbiturates, drug abuse, lethal intoxication, 141
Performance
breath alcohol, EBT-machine, breath-analyzer, requirements, laboratory testing, 27
Peroxidase
hemoglobin, enzyme immunoassay, Fab', bloodstain, 253
Personal identification
salivary α-amylase polymorphism, isoelectric focusing electrophoresis, 159
Polymorphism
human saliva, population genetics, Japanese population, electrophoresis, 119
Population
group specific component, α-2-HS-glycoprotein, race, marker, frequency, forensic, 197
Population genetics
human saliva, polymorphism, Japanese population, electrophoresis, 119
Postmortem
toxicology, eye-fluid, 61
Post mortem diagnosis
brain oedema, 125
Printers
document, dot-matrix, printout, 283
Printout
document, printers, dot-matrix, 283
Psychotropic drugs
extraction technology, high-performance liquid chromatography, UV-detector, 73
Putrefied
teeth, species, counter current electrophoresis, 209

Race
group specific component, α-2-HS-glycoprotein, marker, frequency, population, forensic, 197
Radicals
electron spin resonance, bloodstain, estimation, time after bleeding, degradation, heme, methemoglobin, non-heme iron, radicals, 149
Red cell phosphoglucomutase
isoelectric focusing patterns, Ampholine, Ampholine/separator, immobilised pH gradient, 213
Requirements
breath alcohol, EBT-machine, breath-analyzer, performance, laboratory testing, 27

Saliva
fingerprints, gels, blood, semen, marks, 267
Salivary α-amylase polymorphism
personal identification, isoelectric focusing electrophoresis, 159
Scanning electron microscopy
blasting cap, bombing, explosion, fragments, fiber structure, "dimple" pattern, "knife-edge" pattern, 219
Semen
fingerprints, gels, blood, saliva, marks, 267
Species
teeth, putrefied, counter current electrophoresis, 209
Stomach content
time after food intake, alcohol, contrast media, emptying time, digestion in the stomach, time of death, 83
Stomach contents
toxic metals, X-ray fluorescence, sudden death, mercury poisoning, 181
Substrate specificity
Micrococcus luteus, 10-hydroxy fatty acid, 10-oxo fatty acid, adipocere formation, 277
Sudden death
toxic metals, stomach contents, X-ray fluorescence, mercury radicals, 181

Teeth
putrefied, species, counter current electrophoresis, 209
The priority principle
"opting out", "opting in", cadaver kidneys, determination of death, 131
Time after bleeding
electron spin resonance, bloodstain, estimation, degradation, heme, methemoglobin, non-heme iron, radicals, 149
Time after food intake
stomach content, alcohol, contrast media, emptying time, digestion in the stomach, time of death, 83
Time of death
stomach content, time after food intake, alcohol, contrast media, emptying time, digestion in the stomach, 83
Torture
abuse, doctors, medical ethics, 237
Toxic metals
stomach contents, X-ray fluorescence, sudden death, mercury poisoning, 181

Toxicologic analysis
mother-fetus, overdose, organophosphate, 249
Toxicology
postmortem, eye-fluid, 61

UV-detector
psychotropic drugs, extraction technology, high-performance liquid chromatography, 73

Vaginal swabs (semen contaminated)
DNA fingerprinting, hypervariable DNA, 145
Viral hepatitis
liver pathology, drug addiction, 11
Vital and postmortem wounds
differential diagnosis, cathepsin A, B and D, 51

White matter damage
head injury, 1
Wide-bore capillary GC
benzodiazepines, mass spectrometry, negative ion chemical ionization, 165

X-ray fluorescence
toxic metals, stomach contents, sudden death, mercury poisoning, 181

AUTHOR INDEX

Volume 35 (1987)

Burgess, R.M. 213

Caplan, Y.H. 45
Chagowski, W. 125
Chan, K.K. 1

Dodinval, P. 141

Falzi, G. 11
Fischer, E. 181
Frankvoort, W. 27

Gill, P. 145

Hashimoto, Y. 73
Hattori, H. 165
Hayakari, M. 73
Hernández-Cueto, C. 51
Hinohara, H. 119
Huang, D.Y. 119

Ikemoto, S. 119, 159
Ikeya, M. 149

Kai, A. 149
Kajii, E. 119
Kita, T. 73

Levine, B. 45
Logan, B.K. 189
Lorente, J.A. 51
Luna, A. 51

Madro, R. 125
McCurdy, W.C. 61
Miki, T. 149
Mizutani, Y. 165
Mulder, J.A.G. 27
Murakami, S. 73

Nagai, A. 119
Neuteboom, W. 27
Nishiumi, E. 119
Noirfalise, A. 141

Oliver, J.S. 189
O'Brien, C. 197

Patel, I. 181
Paties, C. 11
Peveri, V. 11

Quiriny, J. 141

Rawle, L.W. 209

Sato, K. 165
Scholtz, C.L. 1
Schreiber, H. 141
Seaman, P.J. 197
Smith, H. 189
Smyth, D.F. 45
Sutton, J.G. 213
Suzuki, S. 83

VOLUME CONTENTS

Volume 35 (1987)

ORIGINAL PAPERS

White matter damage following acute head injury 1
P. Vanezis, K.K. Chan and C.L. Scholtz (London, U.K.)

Liver histopathology in autopsied drug addicts 11
C. Pathies, V. Peveri and G. Falzi (Milan, Italy)

The laboratory testing of evidential breath-testing (EBT) machines 27
W. Frankvoort, J.A.G. Mulder and W. Neuteboom (Delft, Leidschendam and Rijswijk, The Netherlands)

CASE REPORT

A diflunisal related fatality: A case report 45
B. Levine, D.F. Smyth and Y.H. Caplan (Baltimore, MD)

TECHNIQUES AND METHODS

Study of Cathepsin A, B and D activities in the skin wound edges. Its application to the differential diagnosis between vital and postmortem wounds 51
C. Hernández-Cueto, A. Luna, J.A. Lorente and E. Villanueva (Granada, Spain)

Postmortem specimen collection 61
W. McCurdy (Joliet, IL)

Detection of bis(2-chlorethyl)-sulfide (Yperite) in urine by high resolution gas chromatography-mass spectrometry 67
W. Vycudilik (Vienna, Austria)

A rapid and simplified extraction of haloperidol from plasma or serum with Bond Elut C_{18} cartridge for analysis by high performance liquid chromatography 73
M. Hayakari, Y. Hashimoto, T. Kita and S. Murakami (Hirosaki, Japan)

ORIGINAL PAPERS

Experimental studies on the presumption of the time after food intake from stomach contents 83
S. Suzuki (Okayama, Japan)

Further evidence for phenotype and gene frequencies of nine salivary polymorphisms in Japanese population 119
S. Ikemoto, S. Tsuchida, H. Hinohara, E. Nishiumi, E. Kajii, A. Nagai, K. Tomita and D.Y. Huang (Tochigi, Japan and Shenyang, Peoples Republic of China)

An attempt at objectivity of post mortem diagnostic of brain oedema 125
R. Madro and W. Chagowski (Lublin, Poland)

Kidneys for transplant — "Opting out" law in Singapore 131
T.K.K. Iyer (Republic of Singapore)

CASE REPORTS

Death through injection of barbiturates 141
A. Noirfalise, P. Dodinval, J. Quiriny and H. Schreiber (Liege, Belgium)

Exclusion of a man chaged with murder by DNA fingerprinting 145
P. Gill and D.J. Werrett (Reading, U.K.)

TECHNIQUES AND METHODS

Electron spin resonance of bloodstains and its application to the estimation of time after bleeding 149
T. Miki, A. Kai and M. Ikeya (Ube, Japan)

Genetic polymorphism of human parotid salivary amylase detected by isoelectric focusing electrophoresis and silver staining 159
S. Tsuchida and S. Ikemoto (Tochigi, Japan)
Positive- and negative-ion mass spectrometry of 24 benzodiazepines 165
H. Hattori, O. Suzuki, K. Sato, Y. Mizutani and T. Yamada (Aichi, Hamamatsu and Nagoya, Japan)
The determination of toxic metals in simulated stomach contents by energy dispersive X-ray fluorescence analysis and a fatal case of mercury poisoning 181
R. Winstanley, I. Patel and E. Fischer (Chorley, U.K.)
The measurement and interpretation of morphine in blood 189
B.K. Logan, J.S. Oliver and H. Smith (Glasgow, U.K.)
The phenotypic frequencies of group specific component and α-2-HS-glycoprotein in three ethnic groups. The use of these proteins as racial markers in forensic biology 197
S.A. Westwood, P.J. Seaman, C. O'Brien and L.J. Thorogood (Reading, U.K.)
The effect of conditions of putrefaction on species determination in human and animal teeth 209
D.K. Whittaker and L.W. Rawle (Cardiff, U.K.)
A comparison of the isoelectric focusing patterns of red cell phosphoglucomutase separated on an Ampholine, Ampholine/separator and immobilised pH gradient 213
R.M. Burgess, J.G. Sutton and D.J. Werrett (Reading, U.K.)
The characterization of fragments from electric blasting cap after detonation by scanning electron microscopy 219
M. Ueyama and I. Ishiyama (Tokyo, Japan)

ORIGINAL PAPERS
Oxidative enzyme activities and respective histochemical reactions in ischemic rat myocardium 231
J. Hirvonen, J.K. Hiltunen and P. Saukko (Oulu, Finland)
Human rights abuses and the medical profession 237
R. Jandoo (Glasgow, U.K.)

CASE REPORT
Mother-fetus postmortem toxicologic analysis in a fatal overdose with mecarbam 249
H. Tsoukali-Papadopoulou and S. Njau (Thessaloniki, Greece)

TECHNIQUES AND METHODS
A highly specific and sensitive sandwich enzyme immunoassay for human hemoglobin A 253
N. Yukawa, T. Kohno, E. Ishikawa and K. Takahama (Miyazaki, Japan)
The detection of fingerprints and other marks in body fluids by the use of agar gels 267
B.H. Parkin and K. Hartley (London, U.K.)
The mechanism of experimental adipocere formation: substrate specificity on microbial production of hydroxy and oxo fatty acids 277
T. Takatori, H. Gotouda, K. Terazawa, K. Mizukami and M. Nagao (Sapporo, Japan)
Dot-matrix printers 283
M.J. Allen (Birmingham, U.K.)
